# About

Thank you for your interest in the products of Studio Jie Chen!

My name is Jie, a Chinese product designer who lives in Eindhoven, The Netherlands.

I grew up in Hefei, a city which is located in the middle east part of China. In 2006 I moved to Wuxi, and did my bachelor study in Advertising at the Jiangnan University school of design. This study gives design students a solid base in their graphic design, while intensively boosting the knowledge about branding and consumer psychology. In 2010 I moved to the Netherlands, and started my study at the Design Academy in Eindhoven, to follow my passion in craftsmanship and product design. In the summer of 2015 I graduated from the Design Academy in Eindhoven, and started Studio Jie Chen to continue my learning process and practice.

My design studio is located in TAC (Temporary Art Centre Eindhoven); it is my office, workshop and favorite playground. I mostly process my work with my eyes and hands, trying to create products that are fun and playful, with a taste of minimalism and simplicity.

Ceramic has always been one of my favorite materials to work with. It is flexible, delicate and characteristic, but the designing and manufacturing process can be incredibly technical. It involves a lot of responsibility and strength, both mentally and physically.

From the beginning of 2018, my husband and best buddy Merijn joined the team! While I am focused on tackling the design challenges and maintaining the production, Merijn is busy on administration, sales and communication with his professional experiences. We look forward to get in touch with you and your shop, to start our future collaboration.

# Tableware Collection

# Mosey

The Mosey tea set is a product about nomadic/ temporary tea making.

An individual set includes a teapot, a pitcher and 2 tea cups. All the products are easily stack-able. It can be used as a set or individual. The stack-ability of the product allows you to transport it to somewhere else easily. All the pieces are hand polished, the inner side is glazed and they are dishwasher safe.

1

## Teapot

A01-01-a

Material: paper

Size  
W: 50mm  
H: 60mm

Retail price: 10 euro  
  
Can be stored in the  
teapot

## Deep Night

Deep Night is a porcelain series that is decorated with a variable dark blue glaze.

Depending on the thickness of the glaze that is applied, it will give a spontaneous mixing color and texture, going from dark oak to very dark blue. The white part of the product is unglazed porcelain, it reminds us of the warmth and calm character of the material itself.

All the pieces are hand polished and dishwasher safe.

Size:  
W: 140mm  
H: 20mm

Catalog number:  
A10-02

Price: 16 euro

# Speckles

Porcelain is a delicate material but not necessarily fragile and spotless.

Speckles is a surface decoration technique that is used frequently in products from Studio Jie Chen. All the pieces are being speckled by hand individually. The speckles are gently above the surface of the porcelain, and with a tiny bit of glossy texture to form a contrast with the mat porcelain surface.

All the pieces are hand polished and dishwasher safe.

Price: 16 euro

## Oh My Deer

A lot of designers have a love and hate relationship with hand drawn decorations on ceramics. The variety of the hand drawn patterns gives a very personal touch to the ceramic pieces, but also, it easily lets the pieces look outdated.

We know the challenges that are there but sometimes you have to give it a try. Oh My Deer is one of the hand drawn patterns we tested here in the studio. The patterns are hand drawn with a high quality underglaze, then covered partially with transparent glaze.

In general, we believe that there are some tiny deer hopping around on our ceramics in the studio every now and then, and carefully help us print patterns around.

All the pieces are hand drawn, hand polished, and dishwasher safe.

Houseware

## Wind chime factory

Porcelain has a great sound quality, this is because of the high density of the material which is created during baking at high temperature. Based on this characteristic, we designed our wind chime factory.

Every wind chime package contains 4 pieces of colored porcelain, and assembly materials, ready to be assembled to a unique porcelain wind chime. The color combination of the porcelain pieces are hand-picked in our studio, and this means your store will receive a variety of color combinations for the customers to dig into.

Thanks to the flat packaging of the product, it also can be easily posted with a padded envelope (not included in the package).

Wind chime factory at location.  
VDMA eindhoven, Maker's fair, 2016

Wind Chime  
DIY kit

Catalog number:  
B01-01

Each package contains:  
4 pieces of porcelain  
1 wooden stick  
1 roll of string nature color

Each piece of porcelain is  
around 6cmx4cm.  
The wooden stick is around  
16cm.

Price: 12,50 euro

## Porcelain Jewelry

Just like stone and glass, with some care, porcelain can be a life-long material. By playing with porcelain slip carefully, it can create beautiful fluid art texture, and remains solid after baking. Here we made a selection of 11 types of jewelry from our collection. It is light weight, and all the metal pieces of the earring are nickel and lead free.

# Illustration collection

## Seasonal updated

We like stories and fantasy; they are adventures of the mind. Illustrations and storytelling have always been a lot of fun for us. We like to hear “Cool”, but also very much appreciate “Awww”.

On a seasonal base, we create new illustrations and patterns. Depending on the topic and style, it will be applied on our ceramics, postcards or other media. We create our own story, but also take assignments.

Due to the flexibility of the illustration projects, it can't all be shown in this catalog. We can make selections according to the style of your shop, and provide you with the newest designs. Every season we will have new postcards and tableware with illustrations come out, to make sure that our product display is always fresh to the customer.
